with crypto.*

Chewto Inu

A Fair Launch Decentralized
Meme Utility Token.

This is a living, breathing, document influenced by the
Chewto Inu community and the Chewto Inu Foundation.

Ethos

We believe in freedom and the ability to create a better world by leveraging the power of unity, community, and the decentralization of digital assets. Together we can foster a new era of innovation and prosperity for all.

Mission

Our mission is to further the acceleration of cryptocurrency and appeal to the masses. We are focused on discovering their freedom with crypto. For centuries, power, wealth, and freedom have concentrated in the hands of the ruling class and have forced unfavored outcomes for the rest of humanity. Cryptocurrency is the world's wealth innovation tool that offers anyone, regardless of education, class, gender, or race to fully participate in economic activities that have life-changing results in a matter of months and within a few years. The creation of the Mighty Inu story helps us reimagine a better world. Chewto Inu's purpose is to help us forge an age of innovation to help create wealth and prosperity for all. Join Chewto Inu and our community as we tokenize our way into a glorious future.

History

Cryptocurrencies are the highest appreciating asset class in the history of mankind. Bitcoin's price appreciated 6,500,000x in 12 years, from \$0.01 to \$65,000. Shiba Inu is an Ethereum-based token with an initial circulating supply of one quadrillion coins. It pumped from \$0.000000000056 and went all the way up to \$0.00003791. This meme token, named itself the dogecoin killer, has seen a growth of 11430362.4% since its inception on Nov. 28, 2020, and continues to rise. On April 26, 2022, Chewto Inu's price started at \$0.000000000000313790. We are looking to build incredible value and match similar returns for those who believe in Chewto Inu and our cause.

Tokenomics

Chewto Inu is a BSC decentralized Defi project with 975 trillion tokens aimed at revolutionizing crypto by focusing on innovation and mass adoption. We aim to help all people from the blue-collar working class in America to those impoverished in India, from the abandoned and desolate in Africa to the commoner in the United Kingdom. It's for the forgotten in Pakistan, to the dreamers in Lebanon, for the truth seekers in Japan, and the brave throughout the world. These are our people and we want them to know the purpose of the creation of the Mighty Inus; led by Chewto Inu. They are here to bring back balance, wealth, and equity to all mankind.

Our tokenomics utilizes four automated functions to generate value and help maintain price stability. Each function is geared toward creating a smart contract that improves price appreciation and positive impact on transactions. Our auto-staking function rewards Chewto Inu token holders with the incentives to hold by earning up to 7% daily rewards pegged to BUSD. This method provides two things: diversification and a better earnings potential over time.

Each transaction incurs a 3% fee and is automatically sent into the liquidity pool to provide easy swap functions and to increase the speed of order executions. The marketing wallet is utilized to run operations like paid advertising to grow the community, employ a good development team, and pay management, staff, and office-related costs. Therefore, a 6 % fee is allocated on all transactions to continue the success of Chewto Inu. In addition, we are implementing a buy-back and burn program which will serve as a tool to create scarcity and reduce token supply. We will be using gamification strategies and products that generate revenue to buy tokens and burn them. This will make the token look more financially attractive to current and future token holders. We conclude these mechanisms are sufficient and vital to Chewto Inu's success.

Token Utilization

Chewto is launching an ecosystem of apps, NFTs, products, goods, and services. We have created a partnership with Chatafam, a communication application that will serve the chewto Inu community with special perks exclusive only to Chewto Inu token holders. This app will help ChewtoFians create better online experiences based on social, scientific evidence researched by world-renowned social scientists. Users of this application will be rewarded with additional tokens through their point-based system for user activities.

Our NFT project is uniquely built with 4D technology as a separate function and will be offered to Chewto Token holders before anyone else have access to them. Additional utilities can be provided to the ChewtoFians family who desires deeper, richer metaverse experiences. The majority of our products and services will come from our business incubator programs supported by the Chewto Inu foundation. The Get Paid to Learn Program is a community-driven initiative that will run through mycryptoeducation.org for branding, increasing chewto Inu adoption, and overall cryptocurrency exposure to the masses. We are currently working on other utilities like ChewtoSwap, and ChewtoTravel. More about this will be revealed based on Chewto community votes and overall burning strategy.

Chewto Foundation

The Chewto Inu foundation is responsible for the launchpad accelerator program for business, giving to notable charity causes, and community rewards. The business branch is made up of incubator programs for tech startup companies, media-related acquisitions, and film distribution. The charity component will serve under GSP Global initiative primarily funding orphanages around the world, children's hospitals, helping domestic abused women, and rescue missions. The community rewards consist of prizes and giveaways.

Our foundation is built on five pillars. They are innovation, restoration, healing, education, and love. The financial support for the foundation comes from tokens that were purchased by an investor who has agreed to sell back the majority of his holdings to another investor, who has agreed to donate these purchased tokens and fund the Chewto Foundation. Fund usage requires a minimum of three votes before disbursement.

ChewtoFians

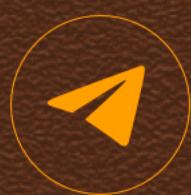

We are a movement, an idea; we believe in economic freedom and liberation for all people. We believe in autonomy, the power of imagination, knowledge, hard work, and perseverance. We believe with one voice and a unified mind, we can leverage the power of faith and do the impossible. Our energy is currency, and our strength comes from the ability to dream. We're inspired to bring life into digital assets awaiting to be actualized beyond the metaverse. Together we can create an environment of innovation. Let's help Chewto Inu rise to help people thrive, restore balance, and make wealth more equitable for all who believe in cryptocurrency.

Support

Purchase your tokens and join the movement towards wealth and equity. Tell friends and family about our token, its mission, and its utilization.

Movement

Chewto Inu belongs to all of us. We welcome grassroots movements and positivity. Let's create communities, chat rooms, discussions, meetings, and gatherings about decentralized finance, freedom, crypto, and the Chewto vision.

Chewto will moon

All things are possible for those who believe.

Chewto Inu Team,

Rediscover your freedom with crypto!
